

# Operator Console & Operator Console Pro

App Overview

An Operator's Best Friend

# Operator Console & Operator Console Pro

## Overview

Busy call-handling personnel now have a friend with Operator Console and Operator Console Pro. These app enables you to manage inbound call traffic efficiently through an easy to use UI. The UI helps field calls and allows you to easily make decisions on where to send them.

With the summary view, you are able to view the status of your employees and can see who is on the phone, how many calls are in progress, and the duration of each active call.

Operator Console Pro takes call handling one step further and gives you the capability to make calls, route calls, and park calls directly in the UI.

With the Operator Console and Operator Console Pro apps, you can:

- View all active and incoming calls
- View parked calls
- See employee status by all, available and busy
- See all devices and which devices are currently available or busy
- Search for a specific person or device

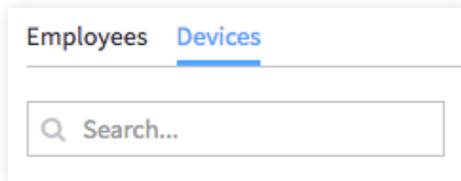

With the Operator Console Pro app, you can:

- Park and retrieve calls without having to remember feature codes
- Route calls to any user, device, voicemail, conference, ring group or queue
- Place calls on hold, end calls, and initiate outbound calls directly in the UI

The screenshot displays the KAZOO Operator Console interface. The top navigation bar includes the KAZOO logo, the text 'Operator Console', and a user profile for 'Alisa Bartash'. The main content area is divided into two sections. On the left, there are two summary boxes: 'MY ACTIVE/INCOMING CALLS' showing 'No Active Calls' and 'PARKED CALLS' showing 'No Parked Calls'. The right section, titled 'Employees Devices', features a search bar and filter buttons for 'All', 'Available', and 'Busy'. Below these is a grid of 24 employee status cards arranged in 8 rows and 3 columns. Each card displays the employee's name and extension number. The card for 'Isaac Vega (10971)' is highlighted in blue and shows a call log: 'On call 30:39', 'From: IsaacSoftPhone2', and 'To: Melissa's Desk'. Other employees listed include Alisa Bartash (1018), Bret Truchan (1062), Clue Con (1018), Derek Miles (1086), Hesaam Farhang (1028), James Ajmonetti (1032), John White (1080), Karl Anderson (1095), Allie Papazian (1098), Chris Kerber (1043), Darren Schreiber (1088), Erik Muramoto (1086), Jay Yoder (1098), Joris Tirado (1035), Kate Zucchino (1086), Ashley Vernon (1035), Clay Finney (1097), David Finnegan (1094), Harry Henao (1025), Izabell Balash (1035), Jeremy Ai (1035), Josh Sanders (1034), and Kevin Bartnicki (1062).

# Operator Console & Operator Console Pro

## Highlights

### Search Capabilities

Easily see employee and device availability when you need to transfer a call quickly. Use the search bar to search by employee name or the name of a specific device to view the status.

### Parked Calls

The user interface shows all parked calls in the account, how long each call has been parked, and the parking slot number. Operator Console Pro allows you to retrieve calls in the UI to ensure the caller doesn't wait too long.

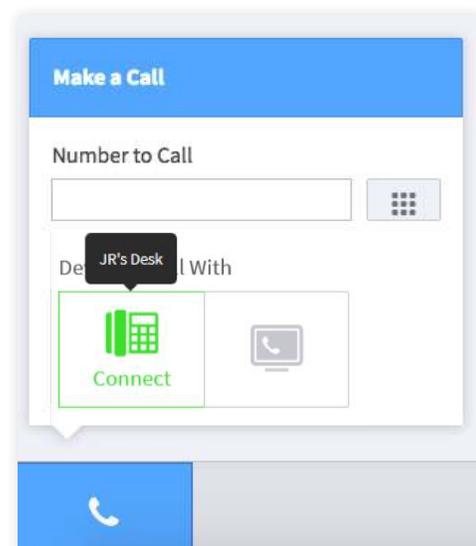

### Call Features

You can see information about current calls, pause a call to put it on hold, transfer a call, park a call, or end a call directly from the UI with Operator Console Pro.

### Device Selector

With Operator Console Pro, you can make calls directly from the UI and select which device you want to place the call from if you have multiple devices enabled.
